

NEW POLICY REGARDING A HALF-CREDIT FOR MATH 11 AFTER RECEIVING CREDIT FOR MATH 5

Under the old policy, it was impossible to count both Math 5 (Introduction to Calculus) and Math 11 (Calculus I) for course credit. Students who received credit for Math 5 and then took Math 11 would not receive credit for Math 11. The Math 11 grade would appear on the transcript, but it would not figure into the GPA.

Under the new policy, **students who enter Tufts starting in the fall of 2007** will receive an additional half-credit (with grade) for Math 11 if they take it after receiving credit for Math 5. Credit for Math 5 may come in the form of transfer or foreign diploma credit or by taking the course at Tufts, but the extra half-credit for Math 11 may only be earned by taking the course at Tufts for a grade.

Students who matriculated BEFORE the fall of 2007 have the option of remaining with the old policy or choosing the new policy. Please contact Lenore.Feigenbaum@tufts.edu in the Mathematics Department for approval to have the new policy apply on your transcript.

Please note that it is **NOT** possible:

- (1) to count the extra half-credit in Math 11 for mathematical sciences distribution credit or
- (2) to receive course credit for Math 5 when taken **after** or **concurrently with** Math 11.
