# We Destroy

Paper, plastic and metal based products

- All types of records, files, and documents
- Credit cards, photo IDs, CDs and DVDs
- Tapes, micro film and microfiche, X-rays
- Hard drives, peripherals and all electronic memory items.

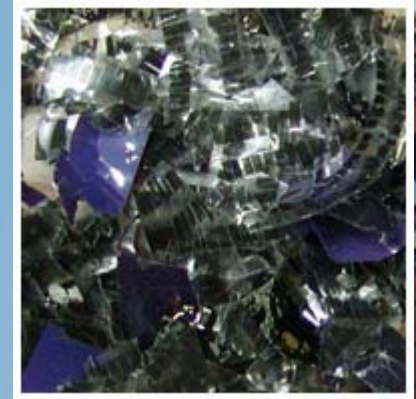

Paper Documents

Credit Cards

Microfiche

Computer back- up tapes

**Items are removed in locked containers, using our unmarked, alarmed, self-locking, GPS enabled vehicles.**

Automatic alarms & locking doors.

Drivers have limited access time prior to alarm activation.

**All our personnel are required to undergo rigorous background checks, including SS#, DMV, credit & criminal checks. All for your added security.**

# Destruction Services

Office “Purges” and locked “Route Service” containers arrive at our facility and are processed within 24 hours.

Fast and efficient shredding is performed with the most up-to-date equipment available.

Confidential documents are conveyor fed to the shredder.

Fully destroyed material is discharged.

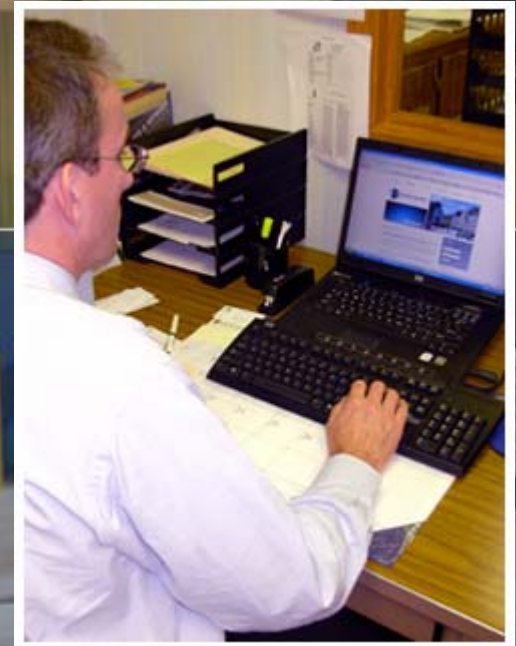

Additional conveyors feed our fully automated high production baling system.

**Our Data Destruction facility is secured with 3<sup>rd</sup> party monitoring alarms, full access control, CCTV, and digital recording.**

**We have the capacity to destroy over 100 tons of confidential materials per day.**

**By accessing our site via a secure internet link, we are able to offer qualified clients the ability to witness their documents being destroyed - from their own office.**

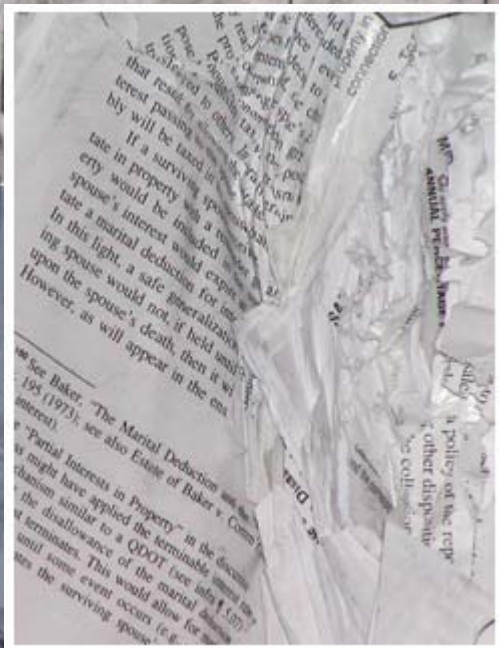

A large stack of paper bales, made of shredded paper, is shown in a recycling facility. The bales are stacked on a blue metal pallet. In the background, there are yellow bollards and a metal door.

## Final Product

- Fully destroyed paper documents in baled form. All paper is then re-pulped and recycled.

**Completely illegible and impossible to reconstruct!**

If you consider “recycling” to be an adequate method of destruction, you are wrong....

...Documents in this bale have only been processed for recycling, and are completely legible for all to read!
