

Would you like to

...significantly increase your practice income?

...build positive relations with trained Tufts veterinary students?

The **Tufts Veterinary Business Management Association** is part of a national student-run organization. We want to educate **you** about the NCVEI benchmarking tools that can help you better manage your practice. **85% of veterinarians who have used this service report an increase in profitability.** Veterinary students trained by the CEO of the NCVEI will visit your hospital and demonstrate how to effectively use the NCVEI tools to improve your practice. **This project is available for small animal, food animal, and equine practices.**

This project will both raise your business acumen and also **promote educational interactions with students committed to the highest standards of practice.**

We suggest a \$250 donation, or \$200 if you are an MVMA, TUVAA, AVMA, or AAHA member! This helps support the Tufts VBMA student group to provide the best possible programming on business, financial, and interpersonal skills to the veterinary community as well as scholarship funds to participating students

The AVMA, AAHA, and MVMA all endorse this project and encourage practitioners to participate in this VBMA-NCVEI joint venture

Sign up today, and watch your practice grow!!!
