

The EWRE/EH/WSSS Seminar Series Presents

# Anthropogenic Signatures in Biogeochemical Responses of Catchments Across Spatio-temporal Scales

**Dr. Nandita Basu**, Assistant Professor of Civil and Environmental Engineering, University of Iowa

*Dr. Basu's research interests include contaminant fate and transport, watershed modeling, environmental and ecosystem hydrology, ecosystem restoration, human impacts on the environment, and water resource sustainability.*

**Dr. Suresh Rao**,

Lee A. Rieth Distinguished Professor in Environmental Engineering, Purdue University

*Dr. Rao's diverse research interests have spanned from lab-scale, process-level studies on environmental fate and transport of various contaminant classes to aquifer-scale and watershed-scale studies on water quality impacts of agricultural and industrial land uses.*

**Friday, February 11, 2011**

**4:00 - 5:30 pm**

**Nelson Auditorium (Room 112)**

**Anderson Hall, 200 College Ave**

**Tufts University, Medford, Massachusetts**

*The Water: Systems, Science and Society certificate program at Tufts University provides graduate students with interdisciplinary perspectives and tools to manage water-related problems around the world. For more information, visit [www.tufts.edu/water](http://www.tufts.edu/water).*
